

Life Changing Lenses

Maxim® is the most valuable option for patients who have ocular surface disease such as Corneal Distortion, Keratoconus, Pellucid Marginal Degeneration, Corneal Transplants, Post Lasik Ectasia, Post RK, and Dry Eye Syndrome. When wearing a Maxim® lens your patients will experience unsurpassed comfort and vision.

VISION

At AccuLens, we pride ourselves in developing "Life Changing Products". The Maxim® lens is one of those products. It has restored the vision for thousands of patients. Maxim® lens will not only meet your patients' visual needs, it will exceed them.

MATERIAL

Maxim® is exclusively manufactured using premium gas permeable material which offers outstanding oxygen permeability without compromising wettability, stability or comfort.

Let Maxim restore your patient's quality of life...today!

"Clinically, I know the Maxim® lens changes patients' lives. I am proud to be part of this new evolution in contact lens manufacturing. We are truly in the business of making life-changing products and with all our scleral lens designs, I know we do exactly that."

*William Masler, FCLSA
Clinical Instructor, Contact Lens
Education University of Colorado
CEO, AccuLens*

COMFORT

Every Maxim® lens is manufactured to the eye specifications of the individual. Conventional gas permeable lenses rest directly on the cornea. Since the cornea is so sensitive this can cause constant lens awareness. The Maxim® lens vaults and mimics the shape of the cornea. It does not rest or move across the cornea making it exceptionally comfortable in comparison to conventional lenses and other scleral lens designs.

- Free In-Office Training
- Trial Lens Sets Available
- 6-Month Warranty
